Problem 3 (20 points). Here are some arithmetic equalities in Jingpho:

1. **jahku² = matsat shi langai**
2. **hkying mi ÷ latsa e hkun manga = matsat**
3. **hkun matsat + sanit shi mali = latsa e lahkong**
4. **kru shi masum × sanit = mali tsa e mali shi langai**
5. **manga shi masum + nitsa e matsat shi sanit = masum tsa e mali shi**
6. **(htam manga hta na hta lahkong + hta sanit hta na hta lahkong) × sanit shi = mali shi matsat**

All integers in these equalities are no less than 1 and no more than 1,000.

(a) Write these equalities in numerals.

(b) Translate into English:

7. **hkying langai lahkong**
8. **htam shi jahku hta na hta mi**
9. **mali manga tsa**

(c) Write out in Jingpho: 98; 121; 212; 345.

△ Jingpho belongs to the Sal branch of the Sino-Tibetan family. It is spoken by approx. 940,000 people in Myanmar, India, and China.

hk, **hky**, **ht**, **kr**, **ng**, **sh**, and **ts** are consonants.

⚠ Tangut belongs to the Burmo-Qiangic branch of the Sino-Tibetan family. It was spoken in Western Xia around 800 years ago.

Western Xia was a regime established mainly by the Tangut people during the era of the Northern Song. Its culture was profoundly influenced by Han Confucianism. The Tangut script, which was used for writing Tangut, was designed by Western Xia by imitating Chinese characters. White Dew is one of the twenty-four solar terms. A cliff cloud is a cloud that forms over a mountain cliff. Loong God is a god that takes the form of Chinese dragon. A watergate is a gate built on an ancient Chinese city wall where the river enters or exits. “To be rapid like the wind,” “to be gentle like the forest,” “to raid and plunder like the fire,” “to be immovable like the mountain,” “to be hard to know like the overcast,” and “to move like the thunder and lightning” are all sentence fragments from *Master Sun’s Art of War*. —Yiming Luo
